

SLANT SIX K1080

TRACTION WHERE OTHER TIRES LET YOU DOWN

WHAT'S NEW

- » 20x2.60 and 24x2.60 youth plus sizes now available in sport wire bead option.

Traction where other tires let you down

This tire is best in intermediate to hard pack terrain. The Slant Six has a massive amount of grip, both in the straights and in the turns. Cornering knobs are positioned far down the casing so you can test your limits in the turns.

Rider profile

You slash into corners and demand the best grip from your XC tire without sacrificing fast rolling qualities.

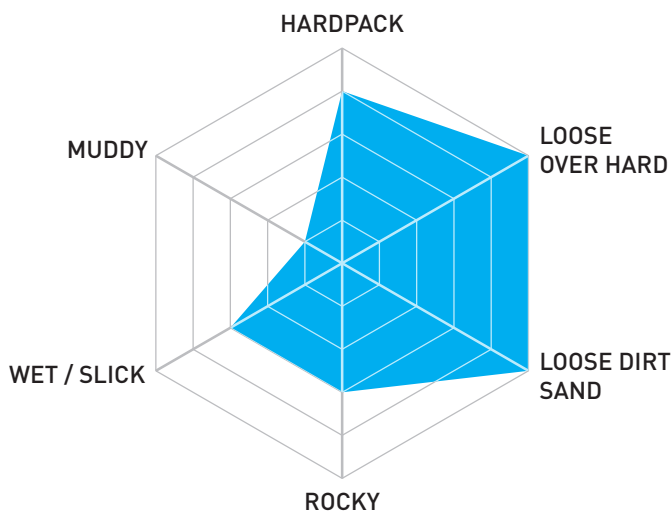

HIGHLIGHTS

- » **Has it all** - Speed, grip and cornering assurance, perfect for intermediate to hard-packed terrain.
- » **Sturdy or light?** Choose between a 2-ply construction and Stick-E or RSR rubber for heavier use, or a lightweight single-ply casing and DTC compound for classic XC and race use.
- » **Tubeless ready** - Saves weight and provides a better rolling performance. Riding tubeless also means riding flat free.
- » **Large selection** - Slant Six Pro is available in sizes 26", 29" and 27.5", in different widths and different protection levels. For every riding style the perfect tire.
